## SPRING HAS SPRUNG!

 The first day of spring was March 19. During spring, the weather gets warmer, the trees get leaves, and the flowers begin to grow. Because it gets warmer, it's also time to play outside. Write and draw about your favorite outdoor activity.

## SPRING HAS SPRUNG!

 The first day of spring this year was March 19. Bees hibernate in the winter and awaken in the spring to collect pollen and nectar from plants. They are very active when the flowers start to bloom and the weather gets warmer. Pretend that you are a bee and write a story about what happened when you woke up to spring.

hive  
spring  
fly  
honey  
queen bee  
sun  
flowers  
pollinate

## SPRING HAS SPRUNG!

 The first day of spring this year was March 19. Every year the first day of spring changes, depending on the sun. Read the facts below and then write about spring.

- The four seasons are winter, spring, summer, and autumn.
- The first day of spring is also known as the vernal equinox.
- During the spring equinox, day and night are almost the same length of time.
- The first day of spring in the northern hemisphere is also the first day of autumn in the southern hemisphere.
- During spring the flowers begin to grow, the trees get their leaves, and the weather gets warmer.
